

Roughhouse Treehouse

Ages 5 to 12

Price: Custom

As a treehouse builder with experience making commercial outdoor play structures, Barbara was tapped to design this treehouse from scratch, including selecting and moving a Southern Live Oak from Texas to Las Vegas. The finished product boasts a tree bursting forth from the center of a big deck that sits between the clubhouse tower, the climbing tower, and a swinging bridge.

The clubhouse tower stacks an outdoor playhouse for big kids atop a 6-foot platform and features special cut-outs to allow the tree's branches to penetrate the walls and roof for a unique, arboreal feel. Three crazy slides - fun and bumpy, smooth and fast, or wavy gravy - offer a fun way down from the other tower. The swinging bridge is a bouncy way for kids to get from one to the other. Put together, the entire playground forms a mini town with a variety of play options for the whole family.

This structure meets ASTM F1487 Standards for Public Use Playground Equipment and the 2010 Americans with Disabilities Act.

Specifications on page 2
