

Lafayette Play Structure

Ages 2 to 5

Price: Inquire

Looking for a play structure for your school yard but don't have the space? Look "outside the box" with a custom design! Barbara was approached by the head of Contra Costa Jewish Day School with an idea: could she make usefull play space of the area that runs along the edge of the sports court, without demolishing or modifying the existing 8' high concrete planters and retaining walls. Barbara's resulting custom design for a fully contained play structure starts at one end of the sports court with the ADA-compliant transfer steps behind a Ball Wall, then winds through a series of tunnels & clubhouses atop the planters, and finally ends with a long tube slide exit at the other end of the sport court. Big impact utilizing very little of the sport court space!

This structure meets ASTM F1487 Standards for Public Use Playground Equipment and the 2010 Americans with Disabilities Act.

Specifications on page 2

Lafayette Play Structure

Entrance Steps / ADA-compliant Transfer System:

- 12' high x 8' wide Ball Wall facing the courtyard, attached to concrete slab;
- ADA-compliant Handicap Transfer System attached behind the ball wall and ledgered to the existing retaining wall:
- Entrance platform with transfer post & safety handles, 6 steps, and mid-level 3.5' x 5' Transfer Platform (step 7), contained with rope netting lashed to railings & to roof framing covering steps 3 thru 7.
