

Rancho California

Ages: 2 to 12

Price: Inquire

Rancho California is a burst of fun in an affordable housing project located in Temecula, California. Unlike the standard, this custom play structure includes a second tower in addition to the main one for double the fun! Kids can choose to enter the first playground climbing tower through the coil climber or through the steps and ADA compliant transfer platform. From there, they can choose a thrilling ride down the open slide or head across the bridge to the second tower, where they can access a tube slide and a rope net climb. Below the structure, more fun abounds with both monkey bars and a crawl tube.

This structure meets ASTM F1487 Standards for Public Use Playground Equipment and the 2010 Americans with Disabilities Act.

Specifications on page 2

Rancho California

Main Tower

4' x 5' x 15' high 2-story Tower (at 6' deck height) open below, with 38" high Fortress railings above and with 4' x 6' single layered T&G Gable roof:
